

## DO'S AND DON'TS FOR CLEANING

### Do's:

1. Clean your Tyvarian product (wall and tub surrounds, shower pans, backsplash, etc) regularly with a *mild, non-abrasive cleaner* (Scrubbing Bubbles, Doterra On Guard, Mrs. Meyers, etc.) and a soft microfiber cloth or sponge.
2. After using shower or bathtub, remove excess water with squeegee after every use to prevent hard water spots. This is a good practice for glass enclosures and wall surrounds.
3. If there are any stains or soap scum buildup, use a mixture of baking soda and water to remove.
4. If using a new product for cleaning, test it first in an inconspicuous area to make sure that it doesn't cause any damage to product.
5. Clean your products regularly for them to look their best.

### Don'ts:

1. *Avoid using abrasive scrubbers, steel wool, or harsh chemicals*, as these can scratch or damage the surface of wall surrounds, shower pans, backsplash, etc.
2. Do not use acidic cleaners, as these can etch the surface and cause damage.
3. Do not leave dye or other strong chemicals on the surface, as they can cause permanent discoloration.
4. Do not place hot items directly on shower floors, as this can cause cracks or other damage.
5. Do not use bleach or ammonia-based cleaners on the wall surrounds or shower floors, as these can cause yellowing or discoloration.

### RECOMMENDED CLEANING PRODUCTS:

- Non-abrasive cleaner (Scrubbing Bubbles, Mrs. Meyers, Doterra On Guard, Windex)
- Microfiber cloths, soft sponges
- Squeegee
